RE: Envirite of Illinois, Inc. EPA ID No. ILD 000 666 206  
Annual Hazardous Waste Export report for Year 2015

Dear Mr. Heiss

The attached report will serve as our annual submission of the 2016 Annual Report of Hazardous Waste Exports Pursuant to 40 CFR 262.56

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.

#### Waste Minimization Plan

As defined in 40 CFR 262.56; Large Quantity Generators (LQG) are required to provide a description of the efforts taken to reduce the volume and toxicity of waste generated throughout the year. LQG are also required to show a comparison from previous years to progress being made in this direction.

US Ecology - Chicago is a Transfer, Storage and Disposal Facility of Hazardous Waste. Due to the nature of our business model and manifesting requirements, all waste taken into the facility for treatment is also taken under ownership by US Ecology thus making the facility a LQG. The "product" that US Ecology sells to its customers is the treatment and disposal of Hazardous Waste; therefore, reducing the volume of the generation of waste is counterproductive to our business success.

Unequaled service. Solutions you can trust.

SDI? Jan 11 2017

US Ecology – Chicago has bought the facility and rights to the federal and state Delist permits obtained originally by Envirite Corporation. The De-list permit enables the company to take in Hazardous waste, treat it with compatible, wastes and reagents to bring it down to acceptable levels of specific pollutants for proper disposal into general purpose landfills. The toxicity of the hazardous waste is rendered chemically inert and therefore the hazard is removed. This is standard operating procedure for all waste that the facility is capable of treating in accordance with the RCRA Part A and B Permit. There are occasions where the facility is unable to treat a waste stream due to the chemicals' strength or restrictions from the permit. These wastes are shipped to sister facilities where they can be treated or disposed of in the proper methods required by law. The vast majority of waste leaving the facility has been De-listed and the toxicity rendered inert thus making efforts to further reduce the toxicity pointless.

If you have any questions regarding the information in this report, please contact me via e-mail at [leaht.thwing@usecology.com](mailto:leaht.thwing@usecology.com) or phone 708.589.6917.

Regards,

Leah Thwing  
EHS Manager  
US Ecology - Chicago

# EXPORT REPORT

## 2016 DATA: 2017 RY

**EXPORTER:** US Ecology Chicago      EPA ID# ILD 000 666 206  
**ADDRESS:** 16435 Center Ave. Harvey, IL. 60426

**DESTINATION:** STABLEX CANADA Inc      EPA ID# NYD 980 756 415  
**ADDRESS:** 760 Industrial Blvd. Blainville, QC J7C3V4

**TRANSPORTED:** Freehold Cartage Inc.      EPA ID# NJD 054 126 164
